Given that the weight for the 40, 50 and 60 hp engines is the same I assume they are built on the same block. That would mean the 40 is a detuned 60? Is one of these engines a better engine, more reliable, more fuel efficient than the others? Is one a dog? I know that with other brands, one motor usually stands out as being the best, when the same block is used over a multiple horsepower range.
