January 15, 2022 at 1:20 pm Started on the aftercooler service today in conjunction with the raw water pump leaks from a previous post. Attached are pictures of the upstream side of the FUEL/OIL cooler, and the aftercooler core. The aftercoolers were last serviced in January 2018 by a reputable Cummins mechanic but I don't think the FUEL/OIL cooler was serviced.

Turn the engine over until cylinder #2 exhaust valve closes and intake valve JUST starts to open. Just as #1 and #6 pistons were at TDC together #2 and #5 pistons are now at TDC. It will take 2 rotations of the engine to adjust all of the valves. Every 120 degrees of crankshaft rotation will position the engine properly for each adjustment.
