Pine. Pine construction lumber is an economical alternative for solid hulls and bread-and-butter model boats. The two biggest issues are yield and stability. Price per board-foot may be less than Poplar, but chances are you have to scrap a lot of wood due to knots, checks, twist and cracks.

Wood for Ship Models - Building Model Boats
A boat is described by its ribs. These are three of the eleven ribs used in our 15-ft wooden boat. Longer boats use more ribs, shorter boats, fewer. Traditionally, Guideboat ribs were cut from spruce stumps. Our approach is to steam, bend and then laminate straight spruce stock. Note the pressure cooker with hoses below the steam box.
